MASterMind Classic 6.52 requires .NET 4.5.1 Framework Full Profile. A web installer is included in the client installation in the event that this is not already installed on your workstations. This could require a restart after which you may need to re-launch the MASterMind setup. We recommend you install the .NET 4.5.1 Profile prior to installing this version of MASterMind Classic.

- MASterMind Classic 6.52 workstations (including terminal service servers such as Citrix™) must run on one of the following Microsoft operating systems:
  - Windows Server® 2016
  - Windows Server® 2019
  - Windows Server® 2022
  - Windows® 10
  - Windows® 11

Note: The operating systems listed above must include the latest service pack and all critical updates.

Your MASterMind Classic 6.52 database is compatible with Microsoft SQL Server® 2014, Microsoft SQL Server® 2016, Microsoft SQL Server® 2017, Microsoft SQL Server® 2019 and Microsoft SQL Server® 2022. Your MASterMind database server should be configured as follows:

- Microsoft SQL Server® 2014
  - Windows Server® 2016 (SP3)
  - Windows Server® 2019 (SP3)
  - Windows® 10 (SP3)
- Microsoft SQL Server® 2016
  - Windows Server® 2016 (SP2)
  - Windows Server® 2019 (SP2)
  - Windows® 10 (SP2)
- Microsoft SQL Server® 2017, Microsoft SQL Server® 2019 and Microsoft SQL Server® 2022
  - Windows Server® 2016
  - Windows Server® 2019
  - Windows Server® 2022
  - Windows® 10
  - Windows® 11

Note: The sql server versions listed above must include the latest service pack and all critical updates.

MASterMind EX requires .NET 4.7.2 Framework.

- MASterMind EX 6.52 workstations (including terminal service servers such as Citrix™) must run on one of the following Microsoft operating systems:
  - Windows Server® 2016
  - Windows Server® 2019
  - Windows Server® 2022
  - Windows® 10
  - Windows® 11
