

# MAsterMind 6.54 Operating System Requirements

Rev A • August 2024

Copyright © 2024 MAS, a Honeywell Company

## Pre-requisite

.NET 4.8 is pre-installed on Windows® 11 and Windows Server® 2022.

MAsterMind 6.54 requires .NET 4.8 installation on:

- Windows Server® 2019
- Windows Server® 2016
- Windows® 10

A web installer is included in the client installation in the event that this is not already installed on your workstations. This could require a restart after which you may need to re-launch the MAsterMind setup.

## Workstation

MAsterMind 6.54 workstations (including terminal service servers such as Citrix™) must run on one of the following Microsoft operating systems:

- Windows® 11
- Windows® 10
- Windows Server® 2022
- Windows Server® 2019
- Windows Server® 2016

## Services

MAsterMind Services can be installed on both workstation and server editions:

- Windows Server® 2022
- Windows Server® 2019
- Windows Server® 2016
- Windows® 11
- Windows® 10

## Database

MAsterMind Databases can be installed on Microsoft SQL Server® editions listed

- Microsoft SQL Server® 2022
- Microsoft SQL Server® 2019
- Microsoft SQL Server® 2017
- Microsoft SQL Server® 2016

**Note:** It is recommended that operating systems have the latest service packs and critical updates.

For services on workstation class hardware and operating systems, the appropriate capacity planning exercise be accomplished.

For SQL Server databases, follow manufacturer recommendations on the supported operating systems versions.
